Very Short Guide To The FPS DAQ Mac

Trouble With FPS DAQ?

1. If you don't find a program FPS running restart the FPS DAQ.
2. If it is running go to the window "FPS Monitor" via the "Expert" pull down menu and click LOAD.
3. If no success restart FPS DAQ.

How To Restart FPS DAQ

Click double on the icon **FPS H1**

$\Rightarrow$ get a window called "FPS Monitor"

if all lights are green $\Rightarrow$ ok!

if not, click LOAD

if not all lights green: reboot Mac, restart FPS DAQ.

Switch On FPS Or PRT Tripped Channel

1. Find a NCSA Telnet session "shift" on the Mac
2. Type **clearalarm** <CR>
3. Type **hvon** <CR> if there is no very high background

Start Telnet Session To Clear Trips

1. Click double on the icon "shift" on the desktop
2. Login as user "shift", password: page 7 of detailed description at rack B19, R307

In case of any problems or questions call the FPS Expert on call
